

AVX, the world's leading manufacturer of Tantalum capacitors, has now released the world first Niobium Oxide Capacitors. AVX Niobium Oxide Capacitors are drawing worldwide attention because of their non-burn technology and availability and stability of raw materials supply. AVX is committed to total customer satisfaction by delivering products of the highest quality, providing strong technical support, and at competitive prices. With one of the fullest lineups in the capacitor business, AVX can satisfy a broad range of customer needs in a myriad of applications.

Tantalum Series Guide

Niobium Oxide Series Guide

Pb Free

RoHS Compliant

Features

- 50V type is available
- 2200 μ F/ 2.5V (V case) is available
- 25m Ω ESR type is available
 50 for TPS series

Applications

- Electronic Equipment in General
- CPU's
- Power Supply Circuit

How to Order

TAJ B 107 M 010 Y

• Carrier Tape

Tape dimensions comply to EIA 481 A.
Dimensions A₀ and B₀ of the pocket and the tape thickness, K, are dependent on the components size.
Tape material do not affect component solderability during storage.
Carrier tape thickness < 0.4mm.

Recommended Reflow Profile for Lead-Free Product

Allowable range of peak temp./ time combination for IR reflow

Please contact us for Lead-Free Products.

Manual Soldering Using Soldering Iron

Item	Condition
Max. Tip Temperature	370°C max.
Max. Exposure Time	3 sec. max.

Technical Summary

- Voltage Derating**
 We can offer to use AVX software "Select-a-Cap" to select a part number for safety use.
- Surge Current**
 As a general rule of thumb, the maximum current a tantalum capacitor can withstand is given by the following equation.

$$I_{max} = V_{rated} / (0.65 + \text{Catalog ESR})$$
 So for example for D case/ 100uF/ 10V capacitor (Catalog ESR = 0.9 Ohms)
 This would be :

$$I_{max} = 10 / (0.65 + 0.9) \approx 6.45\text{Amps}$$
- If more aggressive mounting techniques are to be used, please contact AVX Tantalum for guidance.
- Reverse Voltage**
 The values quoted are not intended to cover continuous reverse operation.
 The peak reverse voltage applied to the capacitor must not exceed.
 - 10% of rated DC voltage to a maximum of 1V at 25°C.
 - 3% of rated DC voltage to a maximum of 0.5V at 85°C.
 - 1% of category DC voltage to a maximum of 0.1V at 125°C.
