

## Varistors

**RoHS**  
COMPLIANT

### FEATURES

- Zinc oxide disc, epoxy coated
- Straight leads
- Straight leads with flange (2381 592 and 593 series only)
- Kinked leads
- Component in accordance to RoHS 2002/95/EC and WEEE 2002/96/EC
- Certified according to UL1449, VDE/IEC 61051 and CSA

### APPLICATION

- Suppression of transients

### DESCRIPTION

The varistors consist of a disc of low-β ceramic material with two tinned solid copper leads. They are coated with a layer of ochre coloured epoxy, which provides electrical, mechanical and climatic protection. The encapsulation is resistant to all cleaning solvents in accordance with "IEC 60068-2-45".

### MOUNTING

The varistors are suitable for processing on automatic insertion and cutting and bending equipment.

Varistors with flanged leads provide better positioning on printed-circuit boards (PCB) and more accurate control over component height. This is important for hand mounting and automatic insertion techniques; see outlines of flanged leads drawing.

### Typical Soldering

235 °C, duration: 5 s (Pb-bearing)

245 °C, duration: 5 s (Lead (Pb)-free)

### Resistance to soldering heat

260 °C, duration: 10 s max.

### MARKING

The varistors are marked with the following information:

- Maximum continuous RMS voltage
- Series number (592, 593, 594, 595 or 596)
- Manufacturers logo
- Date of manufacture (YYWW)

### INFLAMMABILITY

The varistors are non-flammable.

The encapsulation is made of flammable resistant epoxy in accordance with UL94V-0.

QUICK REFERENCE DATA		
PARAMETER	VALUE	UNIT
Maximum continuous voltage:		
RMS	14 to 680	V
DC	18 to 895	V
Maximum non-repetitive transient current $I_{NRP}$ (8 x 20 μs)	100 to 6500	A
Robustness of terminations	10	N
Drop test:		
Height of fall	1	m
Detailed specification	based on CECC 42000	
Storage temperature	- 40 to + 125	°C
Operating temperature	- 40 to + 85	°C

### ORDERING INFORMATION

The varistors are available in a number of packaging options:

- Bulk
- On tape on reel
- On tape in ammpack

The basic ordering code for each option is given in tables titled Varistors on Tape on Reel, Varistors on Tape in Ammpack and Varistors in Bulk. To complete the catalog number and to determine the required operating parameters, see Electrical Data and Ordering Information table.

**Notes**

- (1) The products are certified according to UL (E98144), VDE (40002622) and CSA (219883)
- (2) The sinusoidal voltage is assumed as the normal operating condition. If a non-sinusoidal voltage is present, type selection should be based on multiplying the peak voltage by a factor of 0.707.
- (3) The voltage measured at 1 mA meets the requirements of "paragraph 4.3 of CECC specification 42000".  
The tolerance on the voltage at 1 mA is ± 10 %.
- (4) High energy surges are generally of longer duration. The maximum energy for one pulse of 10 x 1000 µs is given as a reference for longer duration pulses. This pulse can be characterised by peak current (I<sub>p</sub>) and pulse width t<sub>2</sub> (virtual time of half I<sub>p</sub> value, following "IEC 60060-2, section 6"). If V<sub>p</sub> is the clamping voltage corresponding to I<sub>p</sub>, the energy absorbed in the varistor is determined by the formula:  
E = K x V<sub>p</sub> x I<sub>p</sub> x t<sub>2</sub>  
where:  
a) K is dependent on the value of t<sub>2</sub> when the value of t<sub>1</sub> is between 8 µs and 10 µs; see Peak Current as a Function of Pulse Width drawing
- (5) A current wave of 8 x 20 µs (requirement of "paragraph B.2.10.1 of CECC specification 42000") is used as a standard for pulse current and clamping voltage ratings. The maximum non-repetitive transient current is given for one pulse applied during the life of the component.
- (6) For composition of the 12NC part number replace "x" and "y" by figures from the sections "Varistors in Bulk", "Varistors on Tape in Ammpack" and "Varistors on Tape on Reel".
- (7) For composition of the SAP part number:  

Replace "x" by	B for bulk type
	T for tape and reel
	A for tape and ammpack

Replace "y" by	S for straight leads
	F for straight leads with flange (bulk only)
	G for straight leads with flange and H <sub>0</sub> = 16 mm (tape and reel/ammo)
	H for straight leads with flange and H <sub>0</sub> = 18.25 mm (tape and reel/ammo)
	K for kinked leads (bulk only)
	L for kinked leads with H <sub>0</sub> = 16 mm (tape and reel/ammo)
	M for kinked leads with H <sub>0</sub> = 18.25 mm (tape and reel/ammo)

**ELECTRICAL CHARACTERISTICS**

<b>ELECTRICAL DATA</b>		
PARAMETER	VALUE	UNIT
Maximum continuous voltage:		
RMS	14 to 680	V
DC	18 to 895	V
Maximum non-repetitive transient current ( $I_{NRP}$ ) (8 x 20 $\mu$ s) :		
2381 592 ..../VDRS05.....E	100 or 400	A
2381 593 ..../VDRS07.....E	250 or 1200	A
2381 594 ..../VDRS10.....E	500 or 2500	A
2381 595 ..../VDRS14.....E	1000 or 4500	A
2381 596 ..../VDRS20.....E	2000 or 6500	A
Thermal resistance:		
2381 592 ..../VDRS05.....E	$\approx$ 80	K/W
2381 593 ..../VDRS07.....E	$\approx$ 70	K/W
2381 594 ..../VDRS10.....E	$\approx$ 60	K/W
2381 595 ..../VDRS14.....E	$\approx$ 50	K/W
2381 596 ..../VDRS20.....E	$\approx$ 40	K/W
Maximum dissipation:		
2381 592 ..../VDRS05.....E	100	mW
2381 593 ..../VDRS07.....E	250	mW
2381 594 ..../VDRS10.....E	400	mW
2381 595 ..../VDRS14.....E	600	mW
2381 596 ..../VDRS20.....E	1000	mW
Temperature coefficient of voltage at 1 mA maximum	$\pm$ 0.05	%/K
Voltage proof between interconnected leads and case	2500	V
Storage temperature	- 40 to + 125	$^{\circ}$ C
Operating temperature	- 40 to + 85	$^{\circ}$ C
